

I am writing concerning the NAB petition 4-160 which plans to stop XM satellite radio from reporting weather and traffic reports. I have just recently purchased this radio, and, as you know, pay a monthly fee for its use. I live in an area, approx. 85 miles north of Phoenix, Az. where radio reception is very poor. I have searched for years to find something like this XM radio which gives clear reception and around the clock information. I am enjoying it so much, and feel this is in violation of my rights to NOW cut these services out of the daily programming. I am asking that you do NOT take this option away from those of us who have so little radio reception to fall back on. Sincerely
Helen Remington
